Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2611

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Rinaldi.

The Y/C separator and method therefor of Rinaldi (noting particularly Figs. 1a, 2 and 3) includes a comb filter 104, (what can be designated) a sub-detector 116 for determining which of a plurality of correlation ranges an applied signal is situated (col. 3 lines 16-25 and lines 40-43), the ranges initially determined in response to assigned adjustable threshold levels (col. 3 lines 44-47), and wherein the range can be shifted (realized by adjusting the thresholds 210a and 210b) upon determining that the correlation is beyond a certain level (col. 3 line 56 – col. 4 line 13, the detecting being carried out by any of alternative means, as specified in this text), thereby meeting claims 1 and 2.

As for claims 3 and 4, the correlation range can be shifted upward or backward by adjusting the threshold levels stated higher or lower when the video signal exceeds a certain range (noting again col. 3 line 56 – col. 4 line 13).

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

3. Claims 5-20 appear allowable over the prior art.
